We present our four-color photograph of **JUMBO MASTODON PANSIES** selected from our seed fields, actual size.

Lest You Forget! We are originators of Mastodon Pansies, and any seed offered as "Mastodon" is not genuine unless grown in our gardens.

E. J. STEELE

WE ARE all sold on the gigantic size, beauty and outstanding quality of Turner mums, King Alfred daffodils, Laddie Carnations, or American Beauty roses, but we do not all know as yet that mastodon Jumbo pansies belong in the above class of Floral Aristocrats!

Ten years ago we knew its class and now thousands know because they have seen them grow. "Seeing is believing!" As originators of Jumbos we want you to see them grow; preferably in our gardens, in your gardens, or in anybody's gardens. Quality always commands attention interest and builds desire. Super quality in flowers is what charms the lover of flowers and creates the ambition to produce the best that money can buy.

So it is that Jumbo is a "top hat" strain built up to please the "top hat" customer but originated by a real dirt farmer.

Come and see them in all their glory now and if you come early you'll find them in bloom ahead of nearly all other strains.

Preparing Bed for Germinating Seed

1. Have your soil clean and pulverized to a depth of six or more inches.
2. On the level surface spread evenly a layer of pulverized manure, compost preferred, to depth of at least one inch.
3. Overlay manure with half inch of the best soil you have, thoroughly pulverized.
4. Rake down and tamp surface true and smooth.
5. Soak down the bed several inches. Treat seed with Semesan.
6. Sow in drills or broadcast—drills are better.
7. Cover as lightly as possible with your best soil or sand, mixed 50-50 with peat moss.
8. Use spray of water to moisten surface, after light burlap cover is on.
9. Allowing plenty of ventilation, keep your beds moist, quite moist, but not soaking wet, until plants come up.

We use cheapest grade of burlap to retain moisture. As soon as plants begin to come through freely we remove burlap permanently, and sift tops of beds with thin layer of peat moss. To avoid damping off, water young seedlings **VERY SPARINGLY**.

Never allow your beds to become dry. Any dryness after seeds sprout is absolutely fatal. These directions are for sowing in the open field, but will apply when using flats or cold frames. **WE USE 125 TO 150 SQUARE FEET TO SOW AN OUNCE OF SEED BROADCAST.**

CAUTION — Alternate your pansy crop with some other crop.

THE UNUSUALLY HIGH GERMINATING QUALITIES OF STEELE'S MASTODON PANSY SEED is a revelation to all extensive growers who use our stock.

E. J. Steele
Manager

Owing to uniformity required in producing separate colors, the average size is not equal to the types of flowers found in our mixtures. We strongly advise mixtures for your main crop, and you save money thereby.

One of "Bud's" Mastodons

STEELE'S PANSY GARDENS

No. 1 Diener's Ruffled Monsters in 3-inch pots, 12 weeks after sowing

DIENER'S PETUNIAS

Over eight thousand florists raised our Petunias last year and we have heard nothing but praise of their high quality. All of our seed bearers are first raised in 3-inch pots and must conform to the type you see in the accompanying picture of this catalog. This makes the producing of the seeds more expensive, but results in the high quality of our seeds. Every plant is dwarf and stocky, no pinching or staking necessary and they sell at sight. Over 500 seeds per trade packet.

Ruffled Monster Type (Single)

No.	Average about 90% true	Tr. Pkt.
5. RED WITH BLACK CENTER		
OUT OF STOCK		
5.	RED WITH BLACK CENTER50
